

# FLY & INSECT BAITING PROGRAM

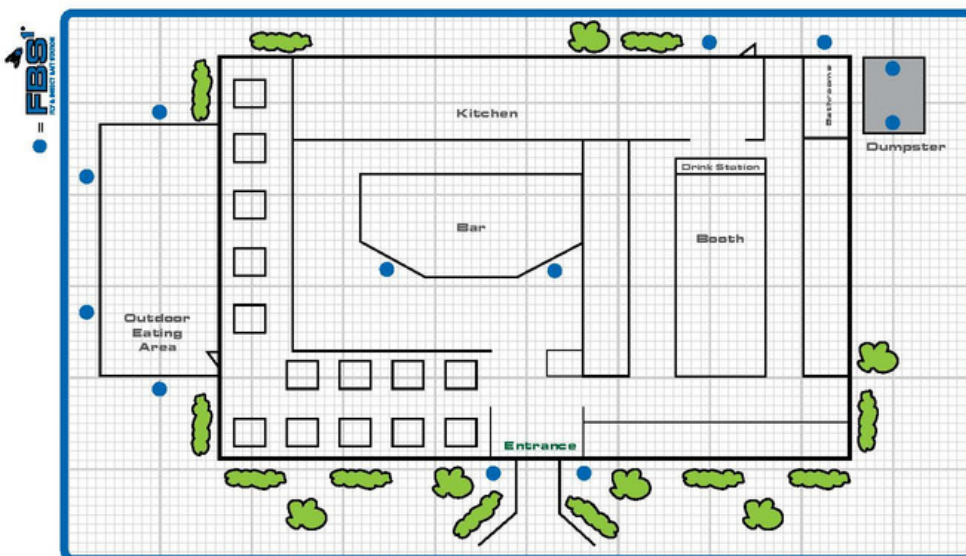

## CREATE RECURRING REVENUE

**SERVICE MONTHLY**  
OR RESULTS WILL BE LIMITED.

**FBS<sup>1</sup>**  
FLY & INSECT BAIT STATION

### SOURCES    ROUTES    CONDITIONS

- S** Are drains filled (dried p-trap)?
- R** Are doors left open or screens missing?
- C** Why are the flies attracted to this location? (What are the attractants?)
- C** How does the client store food? (Look at client practices.)
- C** How does the client handle trash?
- R** Does the building have cracks or openings around doors and windows?
- C** Are there greasy, drippy trails leading from the back door to the dumpster, containing rotting organic?
- C** Is there a large amount of trash buildup around the dumpsters?
- S** Do the dumpsters not empty completely leaving buildup at the bottoms?
- C** Are employees throwing unsealed bags into the dumpster, creating leakage problems?
- S** Could there be possible sewer backup problems? In fast food restaurants, drive-through windows are often left open while food is prepared, allowing flies easy entry.
- C** Are dead rodents in the area? Blow Flies, Greenbottle, Bluebottle, and Flesh Flies are attracted to meat.
- C** Is manure present? House Flies and Little House Flies prefer manure for breeding sites, but will also use rotting vegetable matter and other household garbage.

### PRODUCT PLACEMENT

- 1) Pretreat stations with liquid & granular bait.
- 2) Place around heavy fly areas to monitor acceptance, before mounting stations.
  - Place product 5 ft. off the ground and between 10 ft. and 20 ft. apart based on building pressure.
  - Place two at each dumpster area.
- 3) Results will be based on stages of life cycle. Must get through second and third stages of life cycle before results are seen.
