

DISCREET, WEATHER-RESISTANT FEEDING ZONE FOR INTEGRATED PEST MANAGEMENT

Customize your insect monitoring program with the IBS® Insect Bait Station. The discreet IBS creates a weather-protected central feeding zone to accommodate a wide variety of baits for crawling insects. Use it as part of your long-term baiting program. 100% American made.

1 Locking lid and front cover vents allow insects to enter station while protecting bait from weather and elements, helping to keep it fresh.

2 Comes standard with two removable, shallow bait trays for easy replacement and cleaning.

3 Works with granular, gel, and liquid baits to attract a variety of insects, including ants, roaches, and crickets.

4 Smooth surface allows for easy maintenance and cleaning.

5 Low profile fits securely in tight spaces.

6 Optional integrated ground anchor stake allows secure installation at ground level.

7 Easily mount to walls, fences, stakes, poles, etc., with adhesive tape, nails, screws, zip ties, Velcro®, or Liquid Nails®. Optional custom-fit adhesive tape and double-sided foam available.

8 Uses VM Products Universal Key®.
